

CASE STUDY I-024-2 APT-WORM SYSTEM FOR WHEEL FLAT DETECTION

Customer	Aldrige Electric
Location	Minneapolis (MN), US
Duration	December 2013 - ...
Application domain	Light rail

On the U of M Busway ballasted area, close to Stadium Village Station, Minneapolis (USA), a WORM system for vehicle wheel flat and out of roundness detection was installed. The track is a ballasted track. The cabinet housing the data processing unit and electronics is located alongside the track in the close proximity of the sensors.
